

ARESTIN TREATMENT

Tips to remember after treatment with ARESTIN

Don't touch

- Avoid touching areas of your gums that your Hygienist has treated.

Wait to brush

- Wait 12 hours after your treatment with ARESTIN before brushing your teeth.

Wait to floss

- Do not floss or use toothpicks or any other devices that clean between your teeth for at least 10 days.

Avoid

- Avoid eating hard, crunchy, or sticky foods for 1 week after treatment.

Always follow up

- Because the bacteria that cause periodontal disease are persistent, the infection can return. Please be sure to make follow-up appointments with your dental professional to maintain healthy gums and teeth.

Keep your scheduled appointments

- It is important to keep all of your dental appointments so that your dental professional can re-examine your gums, make sure the infection is under control, and measure the success of your treatment.
